Subject: table of study selection
Attachments: Table_DR_noncx_study_selection.docx

Here is a table. I am having to admit that you were right and this table is really needed to place it all into perspective. Looks like there are several candidates that we need to explain why they weren't used. I imagine there is an explanation and it will all become clear. It will be helpful to have as we talk with Glinda on Friday (also want to do the same with John W and Sue M).
